

## LEED Certification for the Coast Community College District Offices

The Coast Community College District just announced that they have achieved a USGBC LEED rating of *Silver* for their recently completed administrative offices located at 1370 Adams Avenue. Features such as carports with solar panel roofs, an interior that maximizes natural light for all occupants, drought-tolerant landscaping, and permeable surfaces, helped achieve the *Silver* rating. This building is the fourth building in the City to receive a LEED rating.
